PROFILE

Frontend Engineer with experience building scalable, production-grade financial platforms using React, TypeScript, and Next.js. Currently contributing to a large-scale insurance application at TFG, collaborating across cross-functional teams to deliver performant, secure, and maintainable user interfaces. Strong focus on clean architecture, domain-driven thinking, data integrity, and seamless frontend-backend integration. Passionate about building reliable systems that handle complex business logic with clarity and precision.

TECHNICAL SKILLS

- **Frontend:** React (Vite), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux
- **Form & Validation Architecture:** React Hook Form, Zod (Schema Validation), Dynamic Rule Composition
- **API Integration & Simulation:** RESTful APIs, MSW (Mock Service Worker), Async Data Handling, Swagger
- **Architecture & Patterns:** Component-Driven Development, Feature-Based Folder Structure, State Management Patterns, Separation of Concerns
- **Build & Deployment:** Docker (containerizing frontend applications), Git, Azure DevOps, Git, GitHub, CI/CD pipelines

EMPLOYMENT HISTORY

TFG (The Foschini Group)

Aug 2023 - Present

Frontend Developer

Cape Town

- Contributed to the development of a scalable insurance application platform within the VAS Credit Systems team.
- Built and maintained complex user interfaces using React, Next.js, TypeScript, and Tailwind CSS.
- Integrated RESTful APIs and implemented structured state management using Zustand to ensure predictable data flow across multi-step user journeys.
- Collaborated closely with backend engineers, QA, and product teams to ensure accurate business logic implementation and data validation.
- Implemented Builder.io as a headless CMS to streamline content management workflows.
- Utilized Azure DevOps for CI/CD pipelines, pull request reviews, and controlled production deployments.
- Ensured accessibility, responsiveness, and performance optimization across web applications.
- Contributed to an award-winning insurance implementation project (Insurance Implementation Leader Award, 2024).

HR FOCUS

Feb 2018 - Jan 2019

Junior Web Developer

East London

- Built and maintained web applications using HTML, CSS, JavaScript, jQuery, ASP.NET (C#), and MySQL.
- Developed and executed SQL scripts for data cleaning and reclassification within relational databases.
- Assisted over 50 customers daily with technical issue resolution and system troubleshooting.
- Delivered system training and improved operational efficiency through structured support processes.

LERM Corp.

Mar 2021 - Jan 2022

Web & Digital Designer

East London

- Designed and developed responsive websites using WordPress and Divi.
- Created wireframes and interactive prototypes using Adobe XD to streamline client approval cycles.
- Applied HTML and CSS customizations to refine UI consistency and usability.
- Managed project workflows using Bitrix24.

VOLUNTEERING

The Church of Jesus Christ of Latter-day Saints, Liberia Monrovia Mission

Feb 2019 - Jan 2021
